New Dalhi-2 (India);
The 21st July, 1952.

K. MITRA for Registrar General, India.

## NATIONAL SAVINGS CERTIFICATES

Available in three different series, maturing after 5, 7 and 12 years. The yield is 3%, 3.57% and 4.16% simple interest, respectively, at maturity. Thus, in the 12 year-certificates money increases by 50% on maturity. Interest is free of income-tax and super-tax and is not taken into account in arriving at the total taxable income

The certificates are obtainable from Post Offices doing Savings Bank business in denominations of Rs. 5, 10, 50, 100, 500, 1,000 and 5,000. An individual can invest upto Rs. 25,000, and two joint holders upto Rs. 50,000/s.

Full particulars obtainable from Post Offices, District Organisers of the Small Savings Scheme, Assistant National Savings Officers, Provincial National Savings Officers, or the National Savings Commissioners, Similar

Deposits accepted in multiples of Rs 100/- upto a maximum of Rs. 25,000 for a single depositor and Rs. 50,000 for two persons jointly. Interest at 31% per annum (free of all taxes and not taken into account in assessing the total taxable income) is paid or remitted to the depositor's address every year. Deposits accepted at offices of the Reserve Bank of India at Bombay Calcutta, Delhi & Madras, and Branches of The Imperial Bank of India in other places transacting treasury business.

TEN-YEAR EASURY SAVINGS DEPOSITS

Full particulars obtainable from District Organisers of the Small Savings Scheme, Assistant National Savings Officers, Provincial National Savings Officers, or the National Savings Commissioner, Simia.

AC.275

TODAY'S BEST INVESTMENT FOR SMALL SAVERS

Births and deaths from principal diseases in towns with a population of over 30,000 in India for the week ending the 28th June, 1952.

<sup>•</sup> In cases of towns where there has been an abnormal movement of population, it is likely that the population estimates may not be sufficiently reliable for calculating the birth and death rates.

<sup>†</sup> Figures not available.

Explanation of symbols used:—B.-Births; B.R.-Birth Rate; C.-Cholera; S.-Smallpox; P.-Piague; F.-Pevers; D.D.-D. entery and Discretes; R.D.-Respiratory Diseases; M.D.-Maternal Deaths; D.R.-Death Rate; I.D.-Infantile Deaths (included in total deaths)

#### REMARKS

The figures of births and deaths shown in this statement for week ending the 28th June, 1952, relate to 236 towns with an estimated population of 31,283 thousands. The total number of towns is 281 and their population is 34,545 thousands. Thus 84% of the total number of towns representing 91% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 15,930 and 8,691 representing birth and death rates of 26.5 and 14.4 per thousand of population respectively

(A) States (Parts A and O).—The data here relate to 201 towns with an estimated population of 27,380 thousands. The total number of towns is 235 and their population is 29,351 thousands. Thus 84% of the total number of towns representing 91% of the total population is governed. The numbers of births and deaths recorded in these towns were 13,885 and 7,748

representing birth and death rates of 26.4 and 14.7 per thousand of population respectively. The table at the end gives the position by States.

Puri in Orissa was the only town which had a high death rate of 52.2 per thousand of population and this high death rate was mainly due to deaths from dysentery and diarrhoea and fevers.

(B) States (Part B).—The data here relate to 35 towns with an estimated population of 3,903 thousands. The total number of towns is 46 and their population is 5,194 thousands. Thus 76% of total number of towns representing 75% of the total population is covered. The numbers of births and deaths recorded in these towns were 2,045 and 943 representing birth and death rates of 27·2 and 12·6 per thousand of population respectively.

No town recorded a high death rate of 50 or over per thousand of population.
